CYCLING WEEKLY/UK (03/2009): PRODUCT TEST

S60: ...they are efficient!

willyoumaketheleap.com

Verdict:
Excellent
9/10

Stu Bowers, Technical Editor Cycling Weekly - after a 6 hour mountain ride in Majorca

"I seemed to be climbing very well, not at all aware of nearly a pound of extra rotating mass, compared to wheels I am used to.

That tells me they are efficient, something I can not stress enough because, as one of the worst culprits for always favouring the lightest kit, the S60's really impressed me."
